

Rwanda Development Board Mobile App documentation

Company Background

Rwanda Development Board (RDB), is a government department that integrates all government agencies responsible for the attraction, retention, and facilitation of investments in the national economy.

The Rwanda Development Board was established in 2009 to coordinate, spur and promote national economic development.

RDB includes agencies responsible for business registration, investment promotion, environmental clearances, privatization and specialist agencies which support the priority sectors of ICT and tourism as well as SMEs and human capacity development in the private sector.

As an institution that deals with the private sector and one of its main mandates is to register and attract investments/business to Rwanda from inside or outside the country, it came to our attention that their registry department needs something fresh and trending to ease the business registration process.

Mobile Application Features

1. Registering

RDB mobile application users are now able to register themselves, in doing so, they are creating an account with some basic information about them which will ease their use of the application in the future.

2. Login

Users of the application can enter and access some basic services that the application will feature in the coming days.

Upcoming Features

- The application will be able to make users be able to register their business online without going to physical headquarters of the registrar.
