INTERNSHIP REPORT

From the 1st June up to 31st August 2019, I had an opportunity to intern with K-lab located in Kigali.

Klab is an open space for entrepreneurs and especially tech related entrepreneurs

As an intern, I was working with their recent program "250 KIDS" which gathers around kids from age 8 to age 16 and teach them basic coding and website development.

My duties were as follow:

- Preparing lessons and course materials.
- Delivering lessons to children.
- Facilitating sessions that were held there.
- Assist other trainers with course materials prepared for the day.
- Following up kid's projects and assist them with technical aid.

During the internship I learnt how to be proactive, manage kids , prepare lessons for kids between 8-16 years old and deliver them in a concise and effective manner.

I fully thank the African Leadership University to prepare me and equip me with all necessaries to succeed at my internship.
